

VETERINARY SCIENCE IN AUSTRALIA

Information for Overseas' Qualified Veterinarians

September 2020

INTRODUCTION

This booklet has been prepared by the Australasian Veterinary Boards Council Inc for the information and guidance of overseas-trained veterinarians who are resident in Australia and for those interested in migrating to Australia. The AVBC regularly up-dates the information.

This booklet is intended as a guide only and is not legally binding on any of the bodies listed. The information in this booklet is believed to be accurate at the time of printing; however, requirements may change from time to time.

Australia has a federal system of government and is divided into six independently governed States and two Territories. As in most countries, the practice of a profession in Australia requires evidence of an appropriate level of education and practical experience.

Each State and Territory has separate legislation covering the recognition of veterinary qualifications. It is the law in Australia that if you wish to practice veterinary medicine you must be registered with the local State or Territory Veterinary Registration Board.

The steps that you will need to take to obtain registration as a Veterinarian in Australia are explained on page 3 in "Entry of Overseas Qualified Veterinarians into the Profession in Australia".

To migrate to Australia under a points-tested skilled migration category, one of the requirements is to nominate an occupation from the list of eligible skilled occupations which fits your skills and qualifications, and have your skills and qualifications assessed by the relevant assessing authority.

The AVBC has been approved by the Minister for Immigration in accordance with the Migration Regulations 1994 as the assessing authority for the occupation Veterinarian (ANZSCO Code 234711).

If you wish to apply to migrate to Australia as a Veterinarian under the points-based skilled migration program, you may need to apply to have your skills assessed by the AVBC prior to submitting your visa application. The AVBC will assess your skills as "suitable" or "not suitable" for your nominated occupation against the requirements it has established.

If the type of visa you are applying for requires a skills assessment, it must be included with your visa application to the Australian Government's Department of Home Affairs.

Please note that you can only apply for a skills assessment if your primary veterinary qualifications fall into the category of qualifications immediately acceptable to Veterinary Registration Boards and you are already registered with one of the Veterinary Registration Boards.

Successfully migrating to Australia as a Veterinarian is no guarantee of employment in Australia as a Veterinarian. Requirements additional to those for migration may need to be met, and you will need to contact the relevant organisation for advice.

The AVBC can only provide advice on applying for a skills assessment. AVBC does not provide information about how to migrate to Australia. Information is available from the Australian Government's Department of Home Affairs www.homeaffairs.gov.au.

VETERINARY SCIENCE IN AUSTRALIA

Veterinary science is a well established profession in Australia. There are over 13,000 veterinary professionals in Australia. The majority, about 70%, are in private practice, caring for pets, livestock animals, horses, and wildlife and exotic animals. Other fields veterinarians work are corporate veterinary medicine including the pharmaceutical industry, and government agencies which work on the prevention and control of diseases that may affect both animals and people, the environment, and food sources. Veterinary professionals also work in the research and higher education sectors and are employed by animal welfare agencies ensuring animal health and welfare nationally and internationally.

There have been recent developments to :

- encourage the establishment of more and bigger private practices in the cities and towns to care for the growing population of companion animals;
- stimulate the development of livestock and herd health programs in rural areas by private practitioners;
- stimulate specialisation in many areas of veterinary science and the establishment of registers of specialists to advise general practitioners; and
- maintain and improve standards in the fields of veterinary public health and veterinary preventive medicine.

VETERINARY EDUCATION IN AUSTRALIA AND NEW ZEALAND

Currently there are seven AVBC accredited veterinary schools in Australia and one in New Zealand. They are at the University of Melbourne (Victoria), University of Queensland (Gatton, Qld), University of Sydney (New South Wales), Charles Sturt University (Wagga Wagga, NSW), Murdoch University (Western Australia), James Cook University (Townsville, Qld), the University of Adelaide (South Australia) and Massey University in New Zealand.

The qualifications awarded by these schools satisfy the formal academic requirements for registration by all of the Australian and New Zealand veterinary registration boards. The contact details of the veterinary schools and registration boards are listed at the end of this booklet.

Current veterinary education in Australia and New Zealand emphasises diverse training so that the profession is meeting the needs of society. This includes training in sophisticated techniques for diagnosis and treatment of disease, public health and preventive medicine, and animal welfare.

ENTRY OF OVERSEAS QUALIFIED VETERINARIANS INTO THE PROFESSION IN AUSTRALIA

If you are an overseas-trained veterinarian, there are three ways in which you can enter the profession in Australia:

1. by immediate recognition of your overseas veterinary qualifications;
2. by completion of a primary veterinary degree at an Australian or New Zealand veterinary school; or
3. by successfully completing the Australasian Veterinary Examination (AVE).

1. Qualifications immediately recognised for the purposes of registration in Australia

If your veterinary qualification appears on the list of “Qualifications recognised by AVBC as providing the holder with eligibility to apply for registration as a veterinary surgeon in Australia and New Zealand”, then you are eligible to apply for registration with an Australian veterinary registration board without further examination. For example, if you have –

- a primary veterinary qualification obtained via an Australasian Veterinary Boards Council (AVBC) accredited veterinary school;
- a qualification from an American Veterinary Medical Association (AVMA) accredited veterinary school plus the NAVLE;
- a qualification from a Royal College of Veterinary Surgeons (RCVS) accredited veterinary school in the UK and South Africa;

OR

- you have membership of the RCVS by passing the RCVS Statutory Membership Examination;
- you have successfully completed the Educational Commission for Foreign Veterinary Graduates® (ECFVG®) plus the NAVLE;
- you have successfully completed the American Association of Veterinary State Boards Assessment Veterinary Education Equivalence (PAVE) plus the NAVLE;
- you have successfully completed the Canadian National Examining Board Certificate of Qualification plus the NAVLE.

then you are eligible to apply for registration without further examination. For information about registration, you should contact the veterinary registration board in the State or Territory in which you wish to practice.

For the full list of the veterinary science “Qualifications recognised by AVBC”, please see the AVBC website www.avbc.asn.au.

If you wish to apply for a skills assessment from AVBC for migration purposes then you must first be registered with an Australian State or Territory registration board. Detailed information about applying for a skills assessment can be found on the AVBC website.

2. Qualifications not immediately acceptable for registration in Australia

If your qualifications are not acceptable for immediate registration, you can either apply to enrol at an Australian or New Zealand university, where you may be granted credit for your overseas studies, and complete the veterinary science course or you can apply to take the Australasian Veterinary Examination.

3. Australasian Veterinary Examination (AVE)

The AVE has been designed to assess, for registration purposes, the veterinary knowledge and clinical competences of overseas qualified veterinarians whose veterinary qualifications are not immediately acceptable for registration in Australia or New Zealand.

AUSTRALASIAN VETERINARY EXAMINATION (AVE) PROCEDURES

The examination consists of the following components:

- Eligibility Assessment – assessment of qualifications, English language proficiency and associated documents to determine eligibility to undertake the AVE;
- Preliminary (MCQ) Examination – consisting of two papers, in multiple-choice question (MCQ) format; and
- Final (Clinical) Examination

ELIGIBILITY ASSESSMENT

You can take the AVE only if you have been formally assessed by AVBC as meeting the eligibility criteria to sit the examination. You need to:

- hold a degree or diploma awarded after at least four years of study at a veterinary school which appears on the directory of [AVMA ECFVG®-listed veterinary Colleges of the World](#) OR at a school which was part of a college or university listed in the ["World List of Universities"](#); and
- be registered, licensed or eligible to be recognised as a veterinarian of good standing in the country in which you studied your primary veterinary degree or first worked as a veterinarian; and
- hold a current pass to the required standard in the OET, the IELTS (academic) the TOEFL-iBT® or the PTE Academic to the standard required by AVBC. An exemption may apply if you are a native speaker of English, born and educated in the UK, Ireland, Canada, USA, Australia, New Zealand or South Africa.

ENGLISH LANGUAGE REQUIREMENT

A comprehensive knowledge of English is essential to the practice of veterinary science in Australia. If your first language is not English, ie you were not born and (primary and secondary-school) educated in an approved English speaking country, you will need to have achieved the required minimum scores in one of the following English language tests:

- a **B pass** or higher or a score of **350** or higher in each section of the Occupational English Test (OET); or
- a score of at least **band 7** in each section of the **academic** version of the International English Language Testing System (IELTS) test; or
- a score of at least **24** in Listening, **24** in Reading, **27** in Writing and **23** in Speaking in the Test of English as a Foreign Language (TOEFL-iBT®); or
- a score of at least **65** in each of the four communicative skills (listening, reading, writing and speaking) of the PTE Academic.

The required standard must be achieved in the one test sitting. Should you fail to achieve the standard in a single test sitting, you must re-sit an entire English language test. The AVBC does not permit re-sits of sub-sections of English language tests.

The currency of an English language test result is two years. The test must be re-taken after that time.

Please refer to the AVBC English language skills standard which you will find on the AVBC website.

Information about applying for the **OET**, **IELTS (academic)**, **TOEFL-iBT®** or **PTE Academic** can be obtained from the English language test providers. Their website addresses are listed below.

Occupational English Test (OET)

The OET is administered by Cambridge Boxhill Language Assessment, a venture between Cambridge Assessment English and Box Hill Institute. The test includes written, listening, reading and speaking sections and is held in Australia and overseas.

For information about the OET, please refer to the OET Centre website at:

www.occupationalenglishtest.org

Tel: + 61 3 8658 3963

International English Language Testing System (IELTS) - **academic module**

IELTS provides an assessment of whether candidates are ready to study or train in the medium of English. It is readily available at test centres around the world.

You need to sit the **academic** (not the general) **module** of the test.

Band scores are recorded on a test report form showing overall ability as well as performance in listening, reading, writing and speaking.

For information about IELTS Academic, please refer to the IELTS website at:

www.ielts.com.au

Test of English as a Foreign Language - internet-Based Test (TOEFL-iBT®)

The TOEFL-iBT® test is administered by the Educational Testing Service (ETS); it is an internet-based test.

The test measures a candidate's ability to use and understand English at the university level. The test measures reading, listening, speaking and writing skills.

For more information about TOEFL-iBT®, please refer to the ETS/TOEFL website at

<https://www.ets.org/toefl>

PTE Academic

The Pearson Test of English Academic (PTE Academic) is a computer-based test which assesses listening, reading, speaking and writing.

For more information about PTE Academic, please refer to the Pearson PTE Academic website www.pearsonpte.com

Other Useful Information

Australian residents can obtain information about English language learning programs in Australia from:

- Centrelink – Services Australia
- Department of Home Affairs
- Adult Migrant English Program (AMEP) providers
- Technical and Further Education (TAFE) colleges
- Migration Resource Centres (MRC)
- IELTS
- OET
- TOEFL-iBT®
- PTE Academic

AVE PRELIMINARY (MCQ) EXAMINATION (computer-based delivery)

You must pass the Eligibility Assessment including the English language requirement in order to be eligible to sit the Preliminary (MCQ) Examination.

The Preliminary Examination consists of two papers in multiple choice question (MCQ) format. Paper 1 has 120 questions and Paper 2 has 100 questions. The questions are designed to test your general knowledge of veterinary science and clinical judgement.

Further detail can be found in the "Information for AVE Candidates" booklet which is available from the AVBC website www.avbc.asn.au The booklet also contains sample questions.

AVE FINAL (CLINICAL) EXAMINATION

You must pass the AVE Preliminary (MCQ) Examination in order to be eligible to sit the Final (Clinical) Examination. The Final Examination is held over five days and is conducted in an Australian veterinary school. You will be examined at the same level as recent graduates from an Australian or New Zealand veterinary school.

The format of the examination is described fully in the "Information for AVE Candidates" booklet.

EXAMINATION VENUES AND TIMING

The AVE Preliminary (MCQ) Examination is held once a year, usually in April. It can be sat at a number of venues in Australia and at some overseas venues, including New Zealand. The closing date for applications is 8 February.

The AVE Final (Clinical) Examination is held only in Australia, usually in November each year. The closing date for applications is 1 September. (An additional clinical examination session may sometimes be offered mid-year at the discretion of the AVE Committee.)

If you live overseas you may need to apply for a temporary visa to come to Australia, at your own expense, to take this examination.

Late applications to sit any of the examinations described above will NOT be accepted.

FEES

The current schedule of fees for the AVE Eligibility Assessment and the AVE Preliminary and Final Examinations can be obtained from the AVBC website or by contacting the AVBC Office.

Each fee allows only one attempt at an examination. Withdrawal from any examination will result in a cancellation fee being charged.

For current fees for the OET, the IELTS academic, the TOEFL-iBT® or the PTE Academic, please contact the relevant English language test provider.

AVE CERTIFICATE

If you successfully complete the AVE you will be issued with a Certificate. This entitles you to apply for registration with any Australian State, Territory or New Zealand Registration Board. The Certificate will be sent direct to you. You must present the Certificate to the registration board in the State or Territory in which you intend to practise or to the VCNZ if in New Zealand.

Once you are registered in Australia or New Zealand you will have the same rights and responsibilities as all other registered veterinarians in Australia or New Zealand.

HOW TO APPLY

The application forms for a Skills Assessment or for an Assessment of Eligibility to Undertake the AVE are available from the AVBC website www.avbc.asn.au.

Australasian Veterinary Boards Council Inc (AVBC)

Tel: +61 3 9620 7844

General email: admin@avbc.asn.au

AVE Coordinator email: ave@avbc.asn.au

Applicants assessed as eligible to sit the AVE will be sent an application form for the AVE Preliminary (MCQ) Examination.

NEW ZEALAND CITIZENS

Trans-Tasman Mutual Recognition Arrangements (TTMRA)

The Trans-Tasman Travel Arrangement allows Australian and New Zealand citizens to live and work in each other's country without restrictions.

Under the Trans-Tasman Mutual Recognition Arrangement (TTMRA), individuals registered or licensed to practice an occupation in New Zealand are entitled, upon application, to practise the equivalent occupation in any Australian State or Territory, and vice versa. For information on applying for registration under the provisions of the TTMRA, you should contact the registration board in the Australian State or Territory in which you intend to practise.

New Zealand citizens who wish to have their skills and qualifications assessed for the purpose of working in Australia should approach the AVBC or the registration boards directly.

PROFESSIONAL ORGANISATIONS

The Australian Veterinary Association (AVA) and the Australian and New Zealand College of Veterinary Scientists (ANZCVS) are professional organisations which provide information on a variety of professional matters for veterinarians in Australia.

Membership of the Australian Veterinary Association is voluntary and is open to the majority of veterinarians.

Admission to the Australian and New Zealand College of Veterinary Scientists is also voluntary, but an entrance examination must be passed before admission is granted. Fellowships are also available for the College and are considered an important qualification for any veterinarian who wishes to register as a specialist.

Contact details for these organisations and for the New Zealand Veterinary Association follow.

ACCREDITED VETERINARY SCHOOLS IN AUSTRALASIAN UNIVERSITIES

Accreditation of veterinary schools is an integral part of quality assurance procedures for veterinary education. In Australia and New Zealand this system is managed by the Veterinary Schools Accreditation Advisory Committee (VSAAC) which reports to the AVBC.

Veterinary degrees which are currently accredited as a result of the VSAAC process in Australia and New Zealand are listed below.
